

## **ABSTRACT OF THE DISCLOSURE**

1           The tool set is preferably made in three pieces; a main spear that attaches to  
2   and extends from the assembly shaft that projects through a mounting wall of the  
3   transmission housing, and holds the selected assembled parts together; an alignment  
4   spear that engages one bolt hole on the assembly and passes through a hole in the  
5   housing intended for a mounting bolt; and a spacer sleeve to engage the spear and  
6   extend to part of the assembly. The main spear and spacer sleeve can be one part if  
  preferred.
